DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: "112" on page 89, line 16. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

2. The use of the trademark WEED EATER has been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks. It is suggested that applicant substitute the generic term string trimmer for WEED EATER, wherever it appears in the specification and title.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipated by Boyles, 5,467,584.

Boyles discloses a harvester including:

Art Unit: 3671

- a handle element (30)
- a hub with an oblique conical side wall (Fig. 1)
- a string housing (55)
- a guard (67)
- a support roller unit (Fig. 3)

The string housing is mounted on the hub, which is mounted on the handle element. The longitudinal axis of the housing extends at an oblique angle with respect to the longitudinal axis of the handle element (Fig. 1). The support roller unit includes an annular support roller housing (11) that has a longitudinal axis that is co-linear with the longitudinal axis of the string housing (Fig. 3) and a support roller ball (19).

Allowable Subject Matter

5. Claim 1 is allowed.
